Claim 88 is amended. The amendments to claim 88 merely place claim 88 in independent form. No new matter is introduced by the present amendment. Thus, after entry of the instant amendment, claims 42-55 and 88-92 are under consideration.

The Restriction Requirement

The Patent Office has alleged that the pending claims of the application are directed to eight separate and distinct inventions under 35 U.S.C. §121:

The instant application has been restricted to one of the following inventions under 35 U.S.C. §121:

Group I: Claims 1-23 and 67-85, drawn to an isolated nucleic acid molecule or fragment thereof useful as probes in hybridization.

Group II: Claims 24-39, 64, and 86-87, drawn to a purified polypeptide or variants thereof and an antibody which specifically binds to said purified polypeptide.

Group III: Claims 40-41, drawn to a method of producing a purified polypeptide which involves a host cell.

Group IV: Claims 42-55 and 88-92, drawn to a method of mutagenesis.

Group V: Claims 56-60, drawn to a computer readable medium having stored thereon a nucleic acid sequence or a polypeptide sequence.

**In the claims:**

Claim 88 has been amended as follows:

88. (Amended) A method for modifying small molecules, comprising mixing a polypeptide encoded by a polynucleotide comprising a sequence as set forth in SEQ ID NO:1 and variants thereof having at least about 50% identity to SEQ ID NO:1 and encoding a polypeptide having endoglucanase activity [of claim 1 or fragments thereof] with a small molecule to produce a modified small molecule.
